**Mobility** : chair pulled by a tow bar fitted with a handle

## Spare parts

Available on order from our sales department or our website [www.tiralo.org](http://www.tiralo.org)

**Robust !**

## Easy to assemble and maintain.

With its frame and back made of reinforced aluminium, its prime quality is its robustness.

## It has very few parts and is delivered almost fully assembled ;

in just a few minutes you'll be ready to enjoy the pleasures of the sea. By simply rinsing your Tiralo with freshwater after each bathing session, you'll be making the most of it for many years to come.

# With the **tiralolo<sup>2</sup>** everyone can get to enjoy the beach !

## It floats !

Owing to its one-piece float/armrests, guard and wheels, the TIRALO 2 floats and offers optimum comfort for bathing in a sitting position.

The armrests with handles keep the craft stable and have a clever, innovative system that makes use of the water pressure to automatically lock the float in place for bathing.

## It moves !

An accompanying person pulls and steers the three-wheeled chair with the help of a tow bar fitted with a handle. The low-pressure wheels make it easy to pull it over sand and pebbles.

## It's also a sun-bathing chair !

With its highly ergonomic and comfort-focused design, the TIRALO 2 makes it easy for the user to get from their wheelchair to the TIRALO 2, and from the amphibious chair to the sand.

It can be used for extended periods of time, in great comfort, owing to the materials it is made of and its rounded, user-friendly design.

The seat is made of a hypoallergenic material, agreeable to the touch, that fits to the user's body and lets sand and water through.

**AWARDS :** European Program HELIOS II, 1995,  
Paris AUTONOMIC show, 1996, Observateur du design, 2003

**Invented in 1999 by our ESAT, nearly  
4,000 Tiralos have now been sold.**

**The Tiralolo gets a makeover  
and becomes the Tiralolo 2**
